

TEB2014 Software Engineering and HCI	
Lab Assignment 7 – System Development	
Student names & IDs:	
1. Danish Safin bin Zulkarnain 24000149 2. Abdullah Shahir bin Zulmajdi 24000112 3. Dzuriyat Ilhan bin Mohd Ridzuan 24000061	4. Ahmad Aqil Fahmi bin Ahmad Nor 24000235

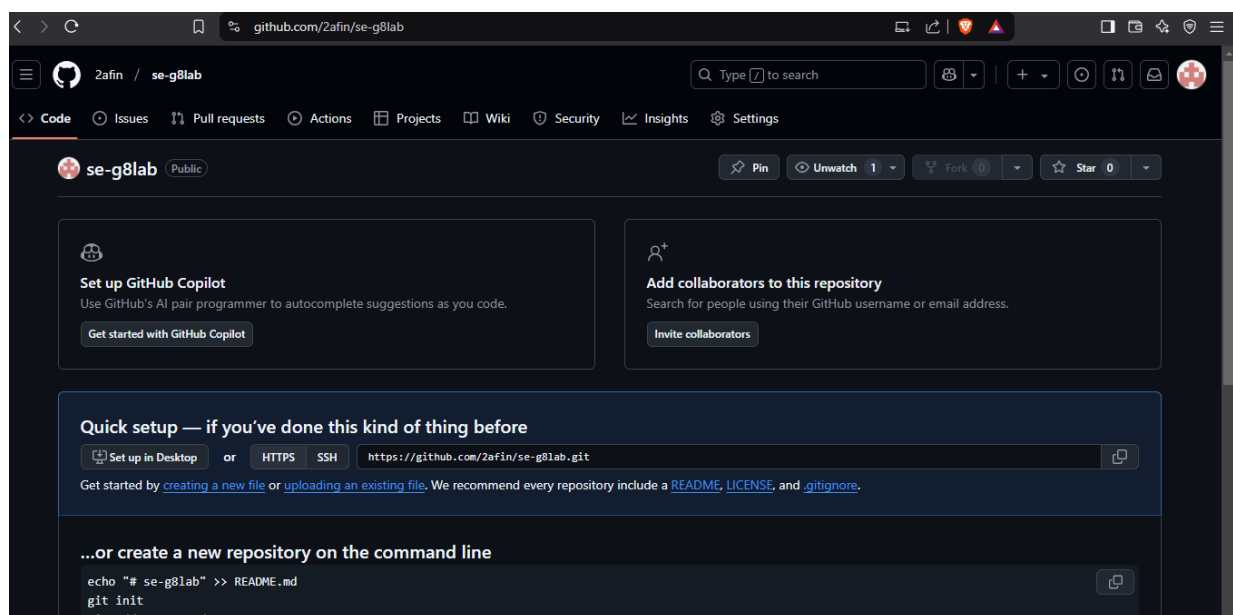

The Hello World project is a time-honored tradition in computer programming. It is a simple exercise that gets you started when learning something new. Let's get started with GitHub!

In this assignment, you will learn how to:

- ✓ Create and use a repository.
- ✓ Start and manage a new branch.
- ✓ Make changes to a file and push them to GitHub as commits.
- ✓ Open and merge a pull request.

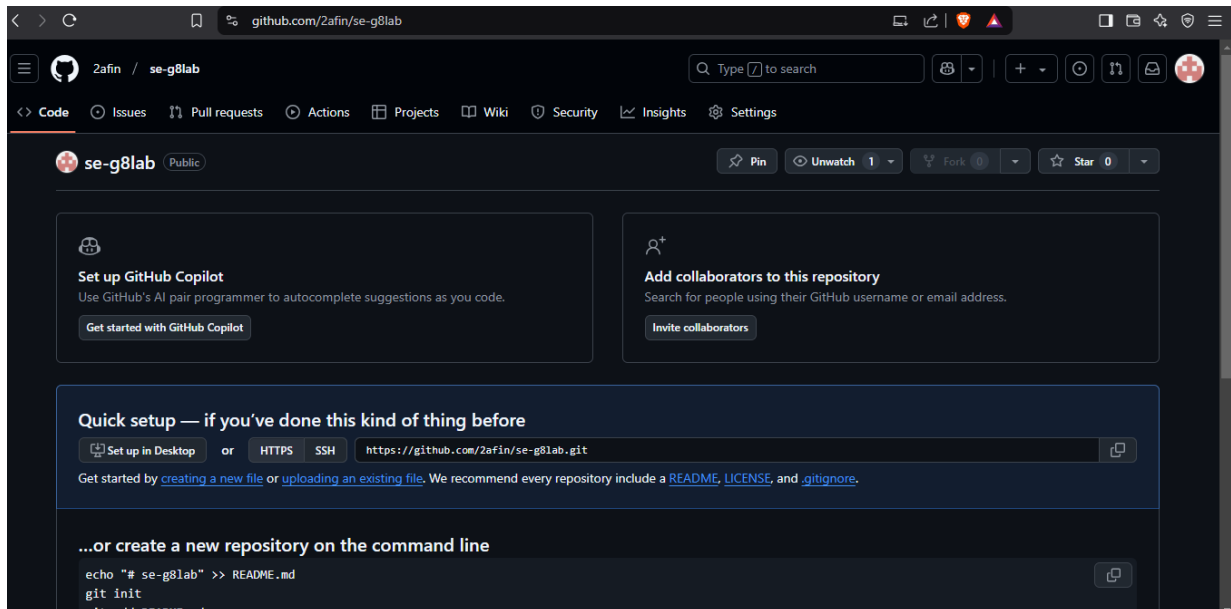

1. Create a GitHub Account.

[2marks]

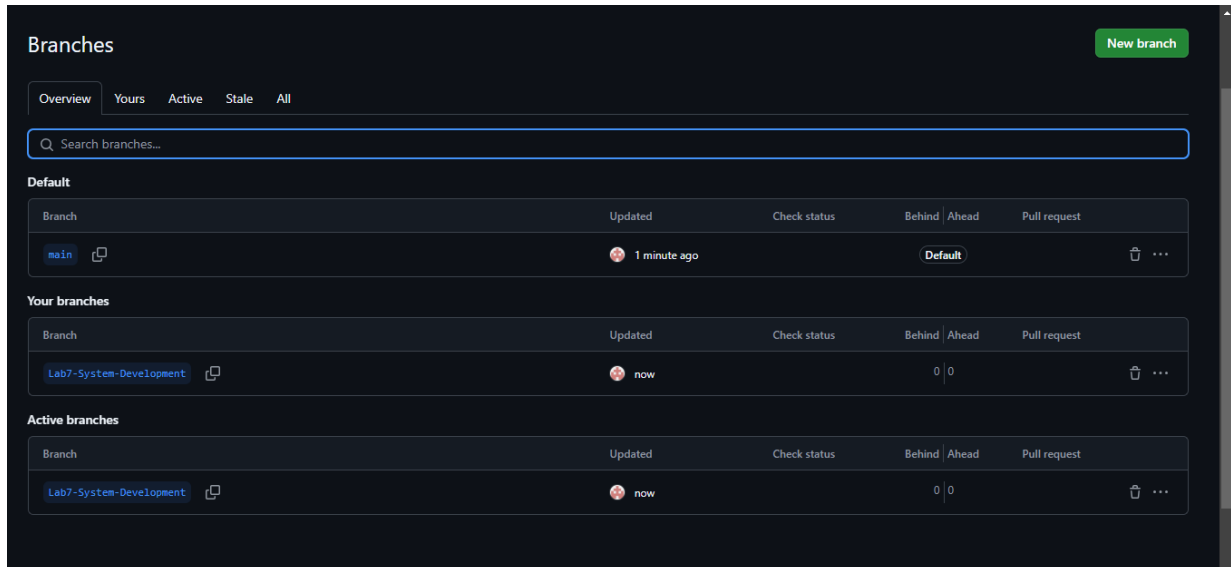

2. Create a Repository.

[2marks]

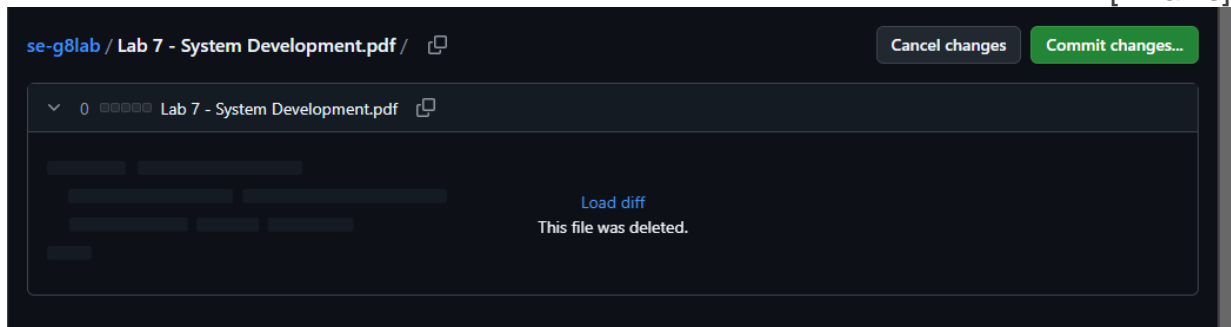

3. Create a new branch of the Repository.

[2marks]

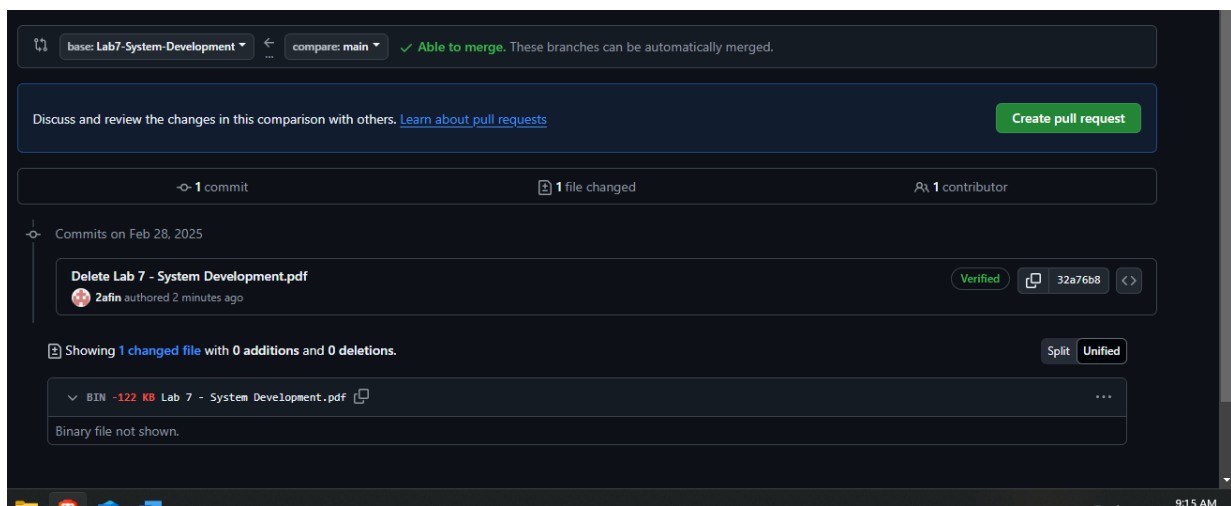

4. Make and commit changes.

[2marks]

5. Open a Pull Request.

[2marks]

6. Merge your Pull Request.

[2marks]

**No conflicts with base branch**
Merging can be performed automatically.
